

SAMPLE DUAL-CREDIT PLAN

Associate degree nursing track

This is a sample schedule for admission into the associate degree nursing (RN) program. This plan allows you to complete the general education requirements for the program while in high school and then enter the ADN program upon graduation from high school. You'd graduate with an ADN degree and have 40 credit hours towards an AA degree.

You must apply for admission into the ADN program and meet admission requirements. This schedule is subject to change.

Dual-credit courses during high school
